DETAILED ACTION

1. Claim 14 is pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Kaneko (US 6,404,473).
4. Kaneko discloses a display device. Figure 9A illustrates an example wherein the end portion of the wiring line is tapered and therefore has a smaller width than the width of the adjacent portion (col.10, l.3-9, col.16, l.11-17). The tapered wiring line is patterned by exposing a photoresist layer 20 through a photomask, developing the exposed photoresist and etching the underlying layers using the photoresist as a mask (col.13, l.5-49).
5. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Trausch (US 4,264,714).
6. Photosensitive layer 12 is formed over pattern metal layer 10 and glass substrate 9 and then exposed. After development the photoresist structures 14 and 15 are formed. As can be seen from figure 2c, the width of the end portion of each structure is smaller than the width of the adjacent portion (col.3, 17-34).
